## 7 Zone Pocket Spring Structure with Memory Foam Top

- The 7 zone pocket spring system is designed by human's shape. It divides the mattress into 7 section, giving different support levels in certain areas: head, neck, shoulder, back, hip, legs and feet.

- Structural of pocket springs help to lift body perfectly, adapts to different types of pressure giving your neck, back, shoulders and feet totally relaxing. Helps your spine -straight while sleeping.

- Exclusively designed for correct support and uncompromising comfort, the softer upper back and pelvic areas provide pressure point relief and spinal alignment. The firmer lumbar area supports the spine to relieve tension and lower back pain.

- Reduces transferring motion to other springs. You will not be interrupted by the motion of your partner throughout the night.
